Thank you, Calvin, for confirming we may transmit the version of the Narrative containing confidential business information (CBI) via the same means we have used in the past.

Please keep an eye out for an email from me containing a secured version of the file. The size is large, over 17 MB, so I am hoping it will go through with a simple email. Else, will have to consider other secure file sharing techniques. I will also work with Shari at Cadmus (copied here) to ensure she receives a secure copy of the file as well.

Best Regards,
-Rebecca

Hi Rebecca,

We don't see an updated Attachment G. Please resubmit the attachment.

You may transmit the file that contains CBI to EPA and Cadmus using the same method in the past.

Thanks,
Calvin

Subject: FW: Class VI UIC Submission: Information Request

Hi David and Calvin,

You should have seen a slew of notifications from the GSDT site today as we were submitting our response to Information Request #7 and updated permit application material. I wanted to take a quick minute to clarify that:

- Our general response to Information Request #7 was submitted through the GSDT's "Information Request" module, under Request #7, and contained direct responses to EPA's follow-up Requests within the Enclosure
- Resulting revised permit application material, e.g. Project Narrative, Attachments A-G, etc., was uploaded to the GSDT into the appropriate the module, e.g. Project Information Tracking, AOR and CA, Pre-Operational Testing, Project Plan Submission, and Alternative PISC Timeframe Demo, per your request
 - o So, you may have seen multiple notifications from the GSDT today, one from each of these modules
- No Confidential Business Information (CBI) was submitted to the GSDT
- We did not submit updates to the Financial Responsibility Demonstration module at this time
- We submitted our initial response to EPA's consideration of other federal laws, including Biological (ESA) and Cultural Resources (NHPA) studies of the Mendota plant site, to the GSDT's "Information Request" module, under Request #1 (not #7). This was because the initial request from EPA came through Info Request #1.
 - o Hence, you should have received two notifications from the GSDT's Info Request module – attached here for reference.
 - o Note, desktop studies for the larger estimated 3D seismic acquisition area are ongoing and results will be submitted once complete.

As in the past, I will need to transmit a version of the Project Narrative that contains Confidential Business Information (CBI) via a secure means. I will call you tomorrow to discuss. I would like to propose using the same method we have used in the past, i.e. password protected file.

I hope this helps. Thank you and as always, please don't hesitate to reach out with any questions or need anything else.

Best Regards,
-Rebecca
